Asset Performance 4.0 Sneak Peeks

Paul Casto talks about Digital Transformation & APM 4.0

Paul Casto, APM Industry Principal, GE Digital

Wednesday 26 October at 13:00 CET

Digital transformation integrates many different business units, functions, and data sources across the enterprise to turn data into actionable information. This transformation journey has been accelerated with the advent of Industry 4.0, the subsequent integration of disparate data sources, and the digitization of work processes. The combination of Industry 4.0 technology, digital twins, predictive analytics, and IIoT platforms has made the development of an APM 4.0 strategy and roadmap imperative for success.

Haris Trobradovic talks about Lubrication 4.0

Haris Trobradovic, Area Sales & Training Manager, SDT International

Thursday 27 October at 13:15 CET

Lubrication excellence has been clearly recognized as the biggest single step in Reliability and profitability improvement and one of the pillars of a proactive approach. Poor or assumption-based lubrication practice causes huge harm and stays unnoticed. Critical first step; recognizing a problem, is often a major obstacle, keeping organization is kind of a denial. Once that hurdle is finally overcome whole new area of questions arise...
